

A PLAN TO LOOK AT · NOTHING IS BUILT YET

CSR Shift Logger

A simple app where each CSR writes down what they do during their shift. The counts add up by themselves, and the CEO watches the whole team live on a separate, password-locked screen.

Tap, fill, done

One app for CSRs, a locked one for the CEO

CSRs just open their app and start — no password. The CEO has a separate screen, locked with one password. Both save to the same place online, so the CEO sees new work the moment it's added.

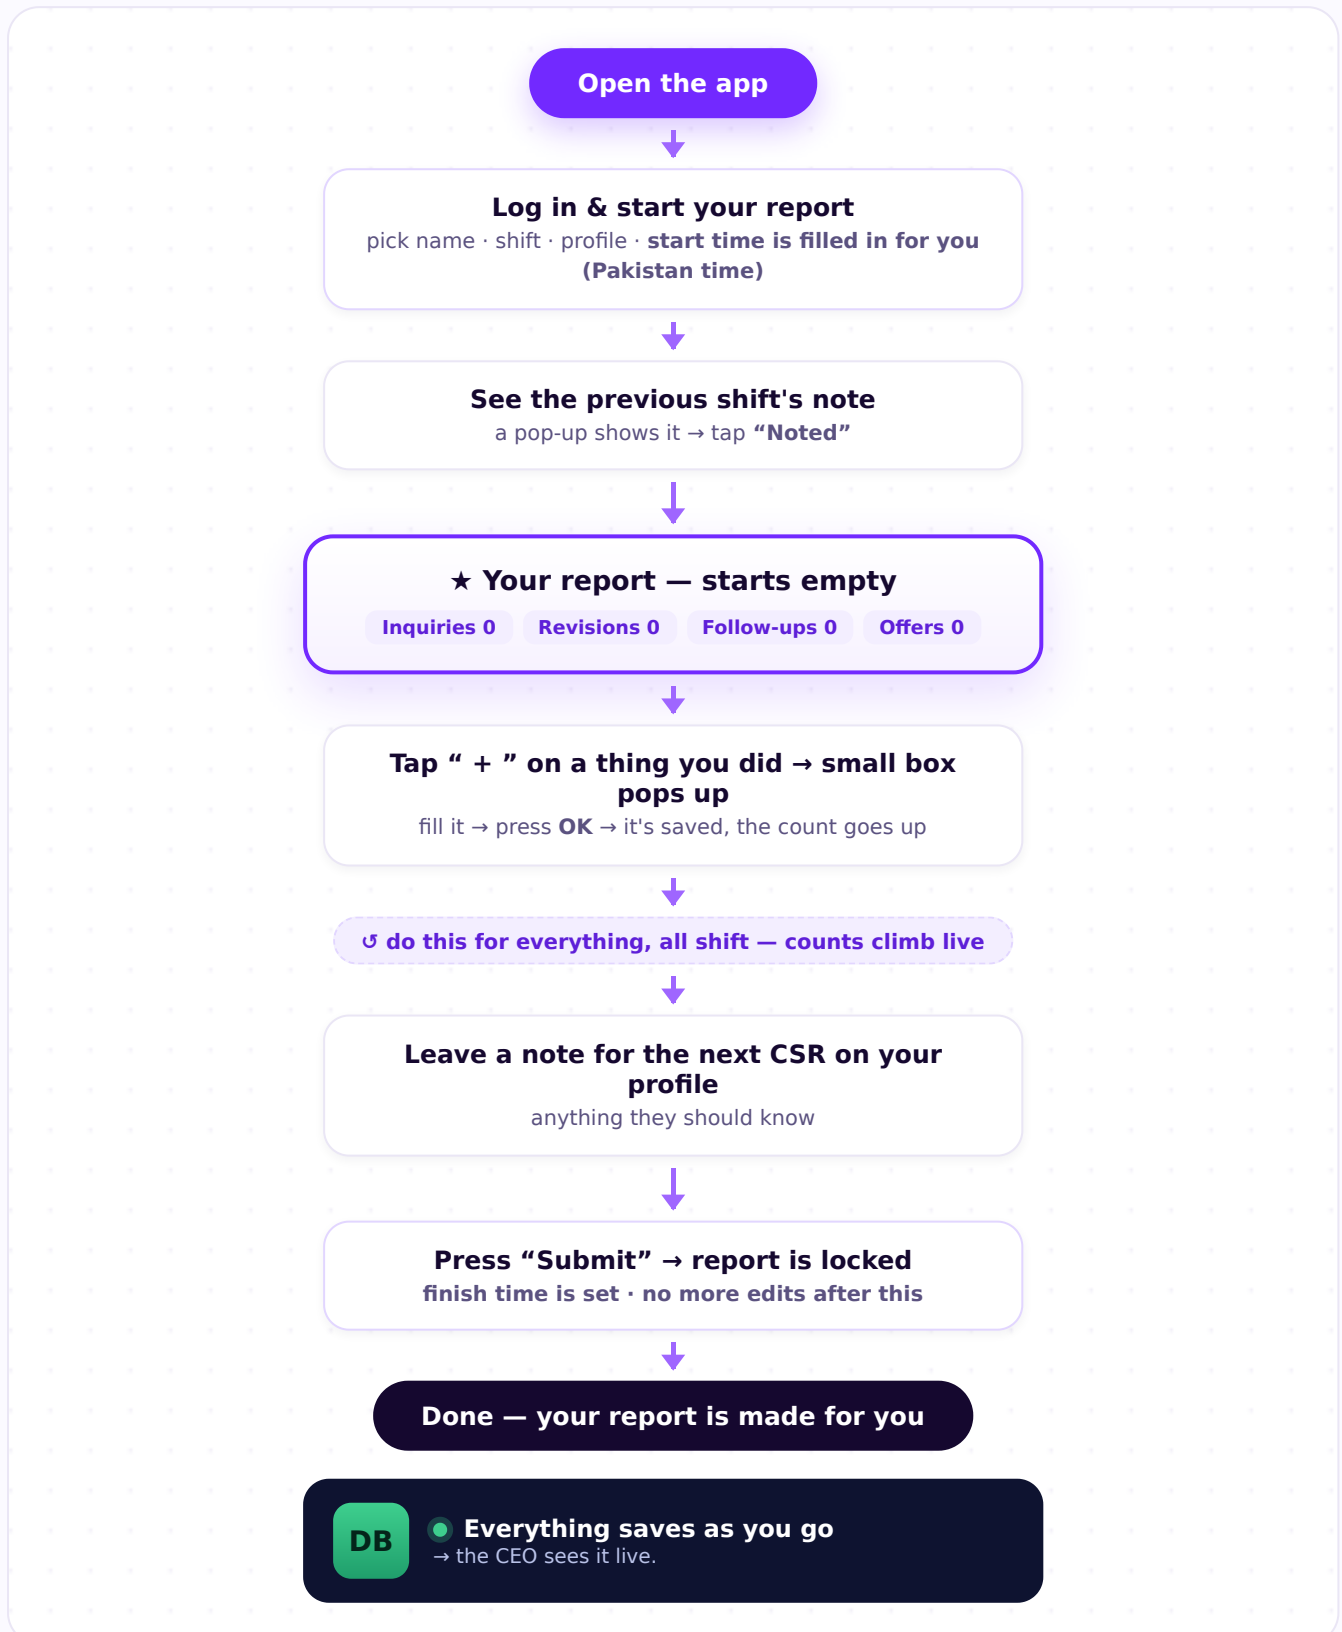

■ In plain words

- Nothing comes from old sheets or ClickUp. **What the CSRs type is the only source.**
- **Only one password — for the CEO screen.** The CSR app opens straight away.
- Everything is **live** — new work shows up for the CEO right away.

How a report works, start to finish

Each shift, a CSR makes a report for their profile. Here it is in order — and everything starts at zero.

Logging in & starting your report

No usernames or passwords. Just pick three things and the app fills in the time and date.

LOG-IN SCREEN

Start a report

DATE & START TIME

13 Jun 2026 · 01:08

filled in

Start my report

What you do

- Pick your **name**, **shift**, and the **profile** you're on.
- The app writes your **start time** and **date** for you.
- Right after, you'll see the **previous shift's note** for that profile (page 7).

Covering more than one profile?

- Each report is for **one profile**.
- If you handle two (e.g. Eikon + Carpicon), just **start a second report** for the other.

The roster (managers can edit it)

These names fill the “Your name” drop-down. Managers add, edit or remove people right in the app — just like CSR Pulse.

Morning9am-5pm	Evening5pm-1am	Night1am-9am
Tanzeel	Tayyab	Salman
Iqra	Hasnain Gillani	Swaid
Hassan	Ali Shakeel	Samama
Amrah	Abdul Basit	Ahmad
	Hadi	Nadir
		Zubair · manager
		Ezan · manager

MANAGE ROSTER (MANAGERS)

Nadir · Night · Eikon	 
Samama · Night · AH2	 
Tayyab · Evening · Storm

The 10 profiles

- Abdul Haseeb
- Tariq Mahmood
- Eikon Designs
- Alee Studioz
- Carpicon
- Dygram Designs
- Storm Design
- WeDesignz
- Grid Designs
- X Studioz

- Each person has a **main profile**; they can still cover another by starting a second report.

Writing down what you did

Tap the “ + ” next to the thing you did. A small box pops up and asks only for what it needs. Fill it, press OK — saved.

Tap “ + ”

A small box pops up

Press OK

Saved — done 🌟

+ Meeting

CLIENT NAME

Aurelius Group

TYPE OF MEETING

New

Old client

WHAT IT WAS ABOUT (AGENDA)

New logo, scope and timeline...

Cancel

OK

Why it's easy

- The box asks **only** what that thing needs — nothing extra.
- Press OK and your **count goes up by itself**.
- You stay on the same screen the whole time.

A few examples

- **Meeting** → client · type · **what it was about**
- **New inquiry** → username · **what they want**
- **Project given to a designer** → client · designer · **project** · **due date**

Your report screen

Your home for the shift. It starts at zero; the counts go up as you add things, and your list shows everything.

Saad · Night · Grid · started 01:08

01:41 · Upsell @negoettsche Old

01:52 · Meeting Aurelius New

Submit my report

It counts for you

- It opens at **0**; the numbers **go up on their own** as you add things.
- You never type a total — the app does the maths.

Fixing a mistake

- Tap any line to fix it — **but only before you submit**.
- Once you submit, the report is **locked**. No more edits.

A note for the next person on your profile

Before you leave, write anything the next CSR on **your profile** should know. When they log in, your note pops up — and they tap “Noted” so you know they read it.

● YOU WRITE IT (BEFORE YOU LEAVE)

Note for next shift · Grid

ANYTHING THE NEXT CSR ON GRID SHOULD KNOW

Client “BALONCE” is waiting on a revision — please send first thing. Aurelius meeting moved to 4pm.

Save note

● THEY SEE IT (WHEN THEY LOG IN)

Previous shift's note · Grid

Client “BALONCE” is waiting on a revision — please send first thing. Aurelius meeting moved to 4pm.

Noted ✓

● It follows the profile

- Many CSRs work the same shift, each on a **different profile**.
- So the note goes to the **next CSR on that profile** — a Grid note waits for the next Grid CSR.
- They tap “**Noted**”, so you can be sure it was read.

● Why it helps

- No more “did the last shift tell us about...?”
- Nothing falls through the cracks between shifts.

Wrap up & submit

Tick off the end-of-shift jobs, then submit. Submitting sets your finish time and locks the report — after this, no more edits.

● TICK WHAT'S DONE

✓ CRM updated

✓ ClickUp cleared

✓ Portfolio updated

✓ Analytics checked

✓ Checked orders one by one

Submit my report

Press "Submit my report"

Finish time set · report locked

CEO can see it · no more edits

● The simple rule

- **Submit = finish + lock.** Nothing else sets your finish time.
- **After you submit, nothing can be changed.** Need a fix? A manager handles it.

Everything you can write down

Every kind of work, each as its own button, grouped to keep the screen tidy. **Violet** words are what the box asks for.

See past reports

Anyone on the team can open the log and read what other CSRs did before, and their counts. You can read it — but no report can be changed once it's submitted.

Tap a row to read the full report

READ ONLY

What it's for

- Catch up on what the shift before you did.
- See any CSR's past reports and counts — **open to the whole team** (nothing to hide).

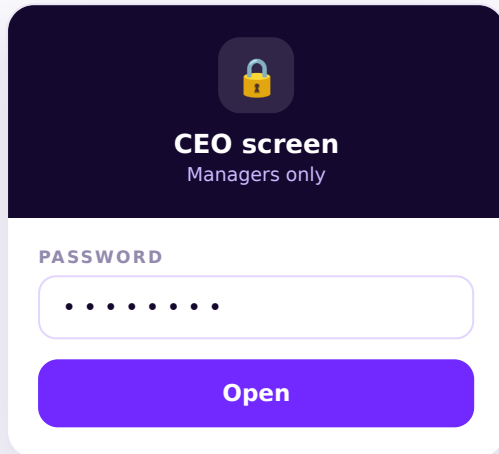

Read only

- You can **open and read** any past report.
- **No report can be edited after it's submitted** — yours or anyone's.

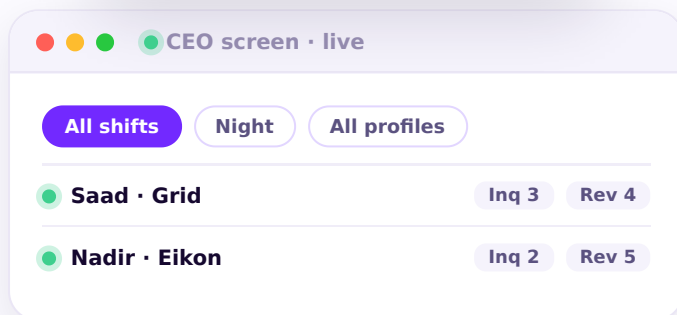

A separate screen, locked by password

A different app, behind one password. CSRs don't have it and can't open it. Inside, the CEO sees every CSR's counts going up live.

● IT OPENS WITH THE PASSWORD

The login interface for the CEO screen. It features a dark blue header with a yellow padlock icon and the text "CEO screen" and "Managers only". Below the header is a white section with the label "PASSWORD" and a password input field containing ten dots. At the bottom is a large blue "Open" button.

The live view interface of the CEO screen. It has a title bar "CEO screen · live" with three colored window control buttons. Below the title bar are three filter buttons: "All shifts" (highlighted in blue), "Night", and "All profiles". The main content area shows two rows of data, each with a green status indicator, a name, and two buttons labeled "Inq" and "Rev".

Status	Name	Inq	Rev
●	Saad · Grid	Inq 3	Rev 4
●	Nadir · Eikon	Inq 2	Rev 5

● Locked away from CSRs

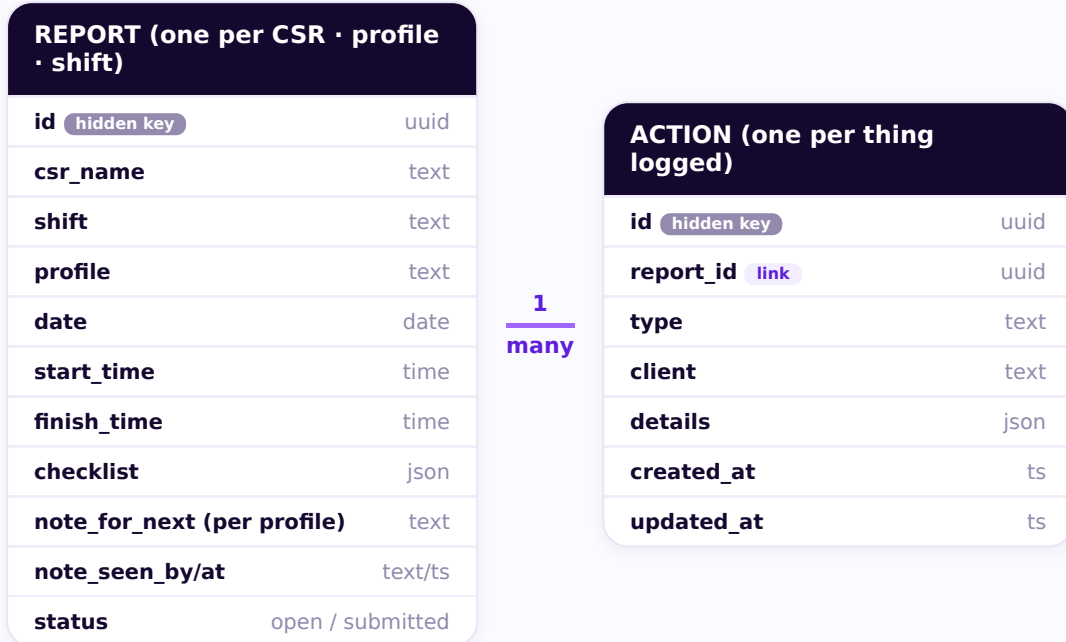

- It's a **different web link** with **one password**.
- The link is never shown in the CSR app.
- CSRs simply **don't have the password** — they can't get in.

● What the CEO sees

- Live totals and a row for each CSR.
- Filter by **shift, profile or date**.
- Numbers move the **instant** a CSR saves something.

What we save & how it's built

The only technical page. Two simple tables, one live database. No CSR ID is shown to users — there's just a hidden key that links the rows.

What's saved

- One **report** row per CSR · profile · shift (no CSR ID shown — just a hidden key).
- One **action** row per thing logged; fields sit in details.
- When status = **submitted**, the app blocks any further edits.

How it's built

- **React + Vite** on Vercel — two apps (CSR open, CEO password-locked).
- **Supabase** database with live updates.
- Hand-off note = latest unread note where profile = yours.
